Ordering Directions:

After surfing both AlbumArt web site and GraphiStudio web site...

Print Out The [GraphiStudio Book Album Order Form](#).

It will ask in several simple steps what Graphi needs to know to make your book. It will raise the questions that will clarify your choices. You may find revisiting our web pages will then make more sense. As with everything today you have a lot of choices.

Spending some time on our sites will allow you to order exactly what fits your idea of a perfect solution for your wedding images.

Pick the images you want in your album. If you have proofs, arrange them in order of how you want them to appear in the album.

Tell a story: Beginning of the day, Ceremony, Groups, Reception, Ending.

Determine Layouts - Album Lines:

Look over the Layout Choices, which we call Album Lines: Director, Studio, Reportage, Design, and Panorama.

Look over the [Layout Chart](#).

Determine which best fits your photos and how you would like to lay the images out.

Do you like one on a page or one on two pages? Or do you prefer two or more on a page?

Reportage Layout Style is the solution for multiple images on a page.

Determine the number of sides or pages you will need for all your photo selections. This will start to determine price.

You need a minimum of 10 sides up to a maximum of 100 sides.

For Director and Panorama, one side equals one image. So if you have 50 proofs (images) then you need 50 sides or pages.

Look over the [Layout Chart](#) again.

Negatives & Prints:

It is best to scan from negatives, so attach the negatives to the proofs in such a way they are easy to get to, but won't fall out by looking at them! Use of glassine envelopes or Print File Sleeves from your processor...is best. Do NOT Touch the negatives with your fingers. Handle only the edge of the negatives, NEVER the flat side. Best to wash your hands with soap before beginning, and during this process to keep finger prints off negs.

Use drafting tape that is acid free or acid free Artist Tape available from art supply stores. Scotch tape is NOT recommended.

Remember to sort them in order of the day and how they are to appear in the album.

For [Digital Files click here](#) for more details.

Choose Paper Type:

Do you want the book to look like a real book with real paper. Then choose Digital Offset with Slim Binding System..

Digital Offset is a wet ink printing process that is printed on textured paper in the Original Wedding Book and on smooth paper for thin Slim Style Book Binding System.

Digital Laser Printing uses the scans from your negatives or Digital Files printing with laser to photographic paper. It is then mounted to mounting substrate for a solid binding system. It cannot be used in the Slim Line of books.

Select A [Cover Material, Style](#) and [embossing](#) if appropriate.

Do you want a [carrying case, or sleeve](#) to put the album in. Or just the free white box it comes with?

Duplicate Albums: Do you want any parent/family albums, or a set of eight or more pocket 4x5 albums for gifts? Any extra calendars for gifts?
